

Outstaffing:
hire top IT
professionals from all
over the world

What's outstaffing?

It's a «rent» of the specialist you need for the time you need on an hourly based payment with full management from the side of the client

- ✓ When you need a certain specialist for a while and don't have him in staff
- ✓ When the scope changes and technical requirements are unclear
- ✓ When the company doesn't want to waste time on employee hiring and personnel management
- ✓ When it's important to control the project progress directly

What is the difference?

Outstaffing

It's the integration of our developers into the customer's workflow under the customer's control and management, and payment is calculated on an hourly basis.

Outsourcing

It's the adoption of a specific task or project by Smartbrain.io from the customer's workflow with control and management by Smartbrain.io at a fixed cost.

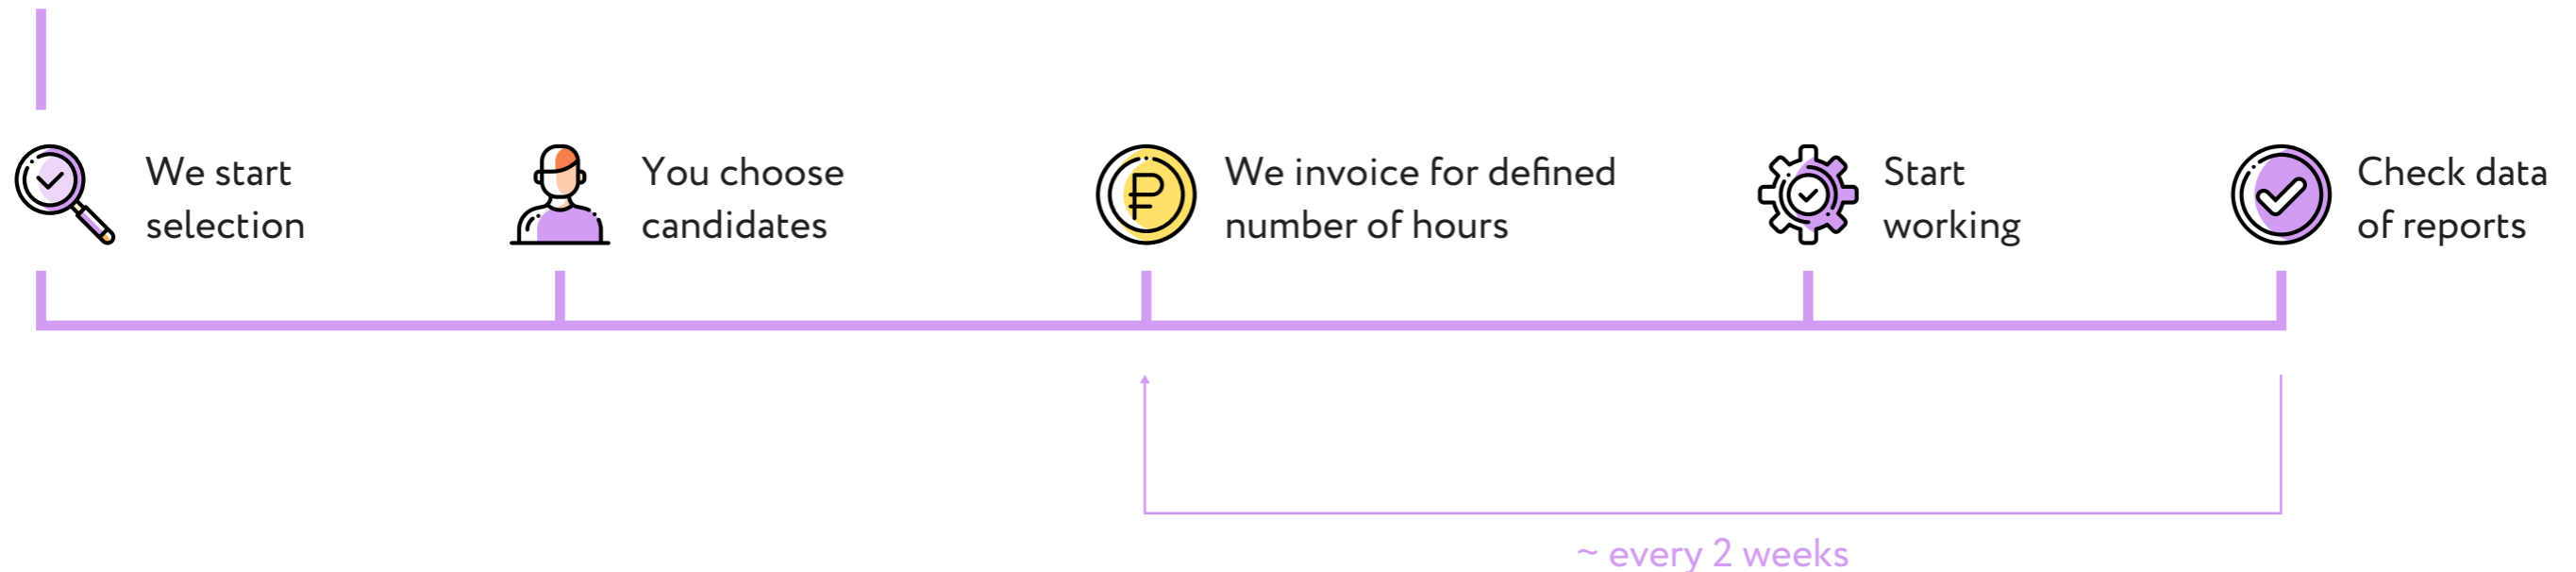

What is the process?

Only two things are needed to start:

1. Fill in the brief
2. Sign the framework agreement

Over 10, 000 specialists

★ Middle from \$40

★ Senior from \$45

Each specialist undergoes a three-stage scoring process before working on any order

1. Application

When specialist applies to join our catalogue we scrutinize his CV, portfolio, quality of work, followed by a detailed interview process to decide if we can consider him as a potential candidate for our client.

2. Selection

We sift our base for the ideal match for a specific request/customer project by evaluating the relevancy of the candidate's qualification and interviewing them.

3. Client's interview

The client determines the need to perform test tasks and the number of interviews in order to make a decision as to whether they are ready to take the candidate.
